No deviations from specification.

2.2 National specifics

The local government reform (1 January 2007) has created a new map of Denmark. 98 municipalities will replace the previous 271. Counties are abolished and five regions will be created. The municipalities will undertake most of the citizen-related tasks. Five new regions will be responsible for health care, preparation of regional development plans and solution of certain operational tasks for the municipalities.

Denmark provides also datasets for Faroe Islands and Greenland.
