

National lineage information EuroGeographics country dataset for EuroBoundaryMap 2020

LT - Lithuania

VĮ Distantinių tyrimų ir geoinformatikos centras "GIS-Centras"

SE National Center of Remote Sensing and Geoinformatics "GIS-Centras"

1 General Information

1.1 Naming convention and transliteration rules

No additional convention and transliteration information.

Lithuanian

national	Ą, ą	Č, č	Ė, ė	Ę, ę	Į, į	Š, š	Ū, ū	Ų, ų	Ž, ž
ASCII	A, a	C, c	E, e	E, e	I, i	S, s	U, u	U, u	Z, z

1.2 Production processing

The Lithuanian contribution for EBM v13 is containing mainly boundaries correction for the 4th level administrative units. Higher level units and international boundaries have not been changed. Some 4th level administrative units were deleted, subdivided, merged or restructured. Attributes (NAMN, NAMA, SHN, ISN) of 4th level administrative units were reviewed and corrected. ARA attribute is not recalculated. Residency of Authority feature class was reviewed and have no updates.

2 Release Information

2.1 Deviation from specification

According to specification it is strictly defined that the administrative division should be like this: each upper level of administrative unit must be divided fluently and covered with no gaps by the lower level of administrative units. It is not like this in Lithuania with our administrative division. All of our 10 "Apskritis" administrative units (USE 2 level) are nicely covered without gaps by USE 3 level administrative units.

The conflict between our actual data and EBM specification starts when we get down to the level 4 "Seniunija", because not all level 3 administrative units are covered (or call it divided) by level 4 (those units have artificial SHN code, while population is calculated subtracting all level 4 units' population from corresponding level 3 unit), some of our level 3 administrative units stop at level 3. Most of level 3 is divided into level 4, that is the lowest official administrative unit level in Lithuania, we do not have official administrative level 5.

Some cities like "Siauliai" have just several municipalities at level 4 that cover just part of the city municipality that is level 3.

Some towns like "Neringos" are of level 3 and do not have level 4 division inside them.

2.2 National specifics

No national specifics.

2.3 Update remarks

No update remarks.

2.4 Reference date

	Reference date	Remark
Geometry	31.12.2018	
Population figures	31.12.2018	AU1 to AU3 (AU4: Last census 2011)

2.5 National administrative hierarchy

Level of administration	Unique structure identifier	Designation of the hierarchy level given in national characters	Designation of the hierarchy level transliterated in ASCII characters	English translation or equivalent of the designation	Significant digits of the SHN code	Number of objects
USE	ISN	DESN	DESA			
1st order (country)	4501	Respublika	Respublika	Country	2	2
2nd order	4502	Apskritis	Apskritis	County	4	10
3rd order	4503	Rajono savivaldybė	Rajono savivaldybe	District municipality	6	43
	4504	Miesto savivaldybė	Miesto savivaldybe	City municipality	6	7
	4505	Savivaldybė	Savivaldybe	Municipality	6	10
	4511	Water area	Water area	Water area	6	5
4th order	4506	Seniūnija	Seniunija	Elderate	8	501
	4507	Miesto seniūnija	Miesto seniunija	Urban elderate	8	30
	4509	Apylinkės seniūnija	Apylinkes seniunija	Suburban elderate	8	8
	4510	Kaimiškoji seniūnija	Kaimiskoji seniunija	Rural elderate	8	5

	USE1	USE2	USE3	USE4
SHN Example	L T	0 0	0 0	0 0
