1.2 Production processing

RGA data set Registry of spatial units is source for production of EBM data set for Serbia.

2 Release Information

2.1 Deviation from specification

No deviations from specification.

2.2 National specifics

Kosovo and Metohija represents and autonomous province of the Republic of Serbia, governed by the United Nations, according to Security Council's Resolution 1244 (1999). Proclamation of the so-called Republic of Kosovo represents a flagrant breach of basic international law principles, including Charter of United Nationals and Security Council's Resolution 1244 (1999).
Dataset for EBM containing borders of administrative units of the Republic of Serbia including the territory of Kosovo and Metohija should be represented according to the data submitted by the Republic Geodetic Authority.

2.3 Update remarks

We kindly ask that this position be taken into consideration, at the time of inclusion of the data in EBM products.

Attribute PPL in the table EBM_NAM is populated

1. For the administrative units on the territory of Serbia based on census from 2011.

2. For the administrative units on the territory of Kosovo and Metohija based on census from 1991. Data are not collected directly on the field, but it is estimated.

3. For municipalities Bujanovac and Presevo based on census from 2011 with estimate number of inhabitants.

Serbian database contains a conflict between tree municipalities regarding border. The administrative units SHN='RS1040002', SHN=' RS0050008' and SHN=' RS0050001' are overlapping slightly. As overlaps are not allowed in EBM, the size of the unit SHN='RS1040002' was reduced.
